Natural & Effective Pain Treatment

InterX Non-invasive Neurostimulation devices are Class II Medical Devices with 510(k) clearance by the US FDA for symptomatic relief and management of chronic intractable pain and adjunctive treatment in the management of post surgical and post traumatic pain.

Manufactured in the USA since 2005, InterX non-invasive neurostimulation devices have been safely and effectively used by medical professionals and patients in the USA Army, USA Marines, USA Airforce, the Mayo Clinic, Duke University, NFL and Olympic Teams.

InterX Research

Ongoing research demonstrates pain and medication reduction with InterX Neurostimulation, a safe, non-invasive and drug free treatment for acute and chronic pain.

Year	Study	View Study:	Pain Reduction	Medication Reduction
2019	Low-Grade Lateral Ankle Sprain	Randomized Controlled Study	Yes	Yes
2017	Chronic Plantar Fasciitis	Randomized	Yes	Yes
2016	Chronic Regional Pain Syndrome (CRPS)	Military Case Study	Yes	Yes
2011	Total Knee Replacement	Randomized	Yes	Yes
2010	Short-Term Recovery with Surgically Repaired Bimalleolar Ankle Fractures	Randomized Clinical Trial	Yes	Yes
2010	Lower Back Pain	Internal Study	Yes	Yes
2010	Total Hip Replacement	Internal Study	Yes	Yes
2007	Post-surgery Ankle Pain and Swelling	Randomized Controlled Trial	Yes	Yes
2007	Trochanteric Fracture of the Femur Post-operative	Randomized Controlled Trial	Yes	Yes
2005	Pain Reduction in the Severe Chronic	Internal Pilot	Yes	Yes
2009	Recurrent Sinusitis	Internal Study	Yes	Not measured
2007	Transected Medial Collateral Ligament	Controlled Trial	Yes	Not measured
2005	Unsolved Sports	Abstract	Yes	Not measured

"I was on narcotic painkillers for 8 years before finding InterX. I had tried everything anyone threw at me. From different medications including seizure medications, anti-depressants, DMSO, pain killers, cbd cream to neuro biofeedback, nerve blocks, tens units, cold laser therapy, to mirror therapy. I had tried anything and everything I could to relieve the pain. I did experience a 100% reduction in pain medicine since InterX. My pain management doctor stated he had never had a patient take them self off of opioids like I did."

-Erin,
Business Management
Regional Sympathetic Dystrophy (RSD) /
Complex Regional Pain Syndrome (CRPS)

"Three years after [ankle replacement] surgery, I asked the surgeon to amputate my leg from my knee down. I couldn't walk. I had to quit my job. They had me on some narcotics, but with all the new laws they had to stop that. There were no benefits from medications or the nerve release surgery. Now [after 4 InterX treatments] I am sitting here with no pain. And that hasn't happened in three years."

—Brian,
Insurance Adjuster and Nurse
Nerve Damage in Ankle Replacement
Surgery Limited Mobility
Amputation Candidate

"I have had much experience with the InterX units and have advocated their use in 3 other clinics; in some of these locations we maintained over 20 units.

I have found them to be invaluable tools both in my role as a primary care physician and as an integrative medicine specialist."

—Respectfully,
Thomas R. Piazza, MD
